Aavenir Contractflow and Agiloft

Aavenir's AI-driven Contractflow solution enables enterprises to standardize and automate contract creation and the end-to-end contract lifecycle. Legal teams can ensure standardization of clause libraries and pre-approved templates, and achieve drastic efficiency gains through AI-driven extractions, clause deviations recommendations, while procurement and sales teams can reduce negotiation bottlenecks and collaborate efficiently with vendors, partners, and customers.

- Decades of CLM domain experience
- Intuitive user experience
- Gen AI & LLM enabled features to complement human intelligence
- Pre-built integration connectors to share contract data

Generative AI-Powered Contract Lifecycle Management

Built natively on ServiceNow, Aavenir Contractflow empowers requestors, contract managers, administrators, and reviewers with an intuitive, easy-to-use contract authoring and management solution. The solution elevates ROI and accelerates time to value by delivering a seamless, Connected Contract Management Experience across procurement and revenue operations processes with pre-built workflows and packaged integrations.
